Q4

Write a short paragraph on "How you secured 90% marks in Board Exam".

"How you secured 90% marks in Board Exam"

It is not very difficult to secure 90% marks in Board Exam. The things necessary for the people (students) to do is that they should do regular studies from the day the school opened. I did the same thing and I also paid attention to subjects that teacher teaches in the class. Only learning from textbook is not the way to study. It is said that teachers are the true textbooks for students.

I also attended the classes regularly. While giving the board exam, attention should be paid towards what we are writing and not on what others are doing, and never do cheating.

It is said 'Sound body keeps sound mind'. I also took proper rest in the examination time and examination time is to revise the subjects and not to learn at that time, so learning of the lessons should be done before the examination.

During examination time I took proper diet and I got full co-operation in studies from my teachers as well as my parents.

6. Deforestation is imbalancing the ecosystem. Write your views

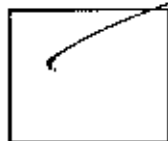

Ans

"Deforestation is Imbalancing the Ecosystem"

Cutting of trees recklessly by human being is called deforestation. This has become an international problem. Trees are being cut at very high speed which is imbalancing the ecosystem as a result of which living beings are suffering.

Trees provide us with many useful things like the act as rain bearers, they keep the climate moderate, check the velocity of wind and they also provide us with many useful industrial things like j. wax, rubber etc. they maintain the balance of environment.

But now a days people cut the trees for making their furnitures, burning fuel, for making their houses, for construction of roads as a result of which

they are destroyed as the trees are destroyed their content of carbon di oxide is increasing as a result of which people are getting victim of several diseases.

Also if trees are destroyed than their will be no rain and if there is no rain than drought condition will become more severe.

As CO_2 is increasing the ice of the polar regions is melting because of which many areas are washed with water. This is called global warming.

Deforestation also causes holes in the ozone layer as a result harmful ultraviolet rays of the sun are coming to earth causes diseases like cancer, skin disease, etc.

So in this way the deforestation is destroying the world and imbalancing the ecosystem.

So government of India have started various programmes for the plantation of forest like Vanmahotsav, social forestry Programme, etc.
