A short note - describing the scene
at Polio Camp.

Last Sunday a Polio Camp was held under the National Polio Eradication campaign by the primary health centre. A special tent was erected for this purpose. When I went there I saw long queues of parents with their children upto five years. The older children were standing beside their parents. Some ladies had their babies in their arms. The nurses were giving instructions to the parents.

There were some units of Red cross, scouts and guide to make the arrangements.

A nurse was sitting on the counter and was noting the name and address of the child. Another nurse was putting the indelible ink-mark on the left hand's index finger of the child. Then the nurse was saying to baby or to his parents to open the mouth of baby and she putted two drops of vaccine into mouth.

Thus the camp organised successfully and almost 250 children took benefit of it.

"Nature's bounty is boundless"

This is rightly said because the nature is really wonderful. It has amazing features. The nature all around us is very beautiful. The fountains, greenery on land, forests, lakes make us more beautiful.

There are no limits of nature. It is boundless. Nobody can express its original feature. Various creatures increase its beauty.

In our country there are several places which have

2. Scientific inventions :-

"Necessity is the mother of
all inventions"

Men's curiosity has discovered several things which are very useful in our life

Falling of an apple from the tree has helped Newton to discover the laws of gravity. Water boiling in a kettle has helped us in discovering the railway engines.

Man's necessity is unlimited so the invention of science are also unlimited.

Science as a blessing or
a curse :-

Everything has two sides
Science too has a dark side
Science is creating many
problems also. It has discovered
atom bombs etc. The invention
and production of the atom
bombs and other dangerous
weapons is a great threat
to modern world and to
humanity.

Science can destroy the
world within a second.

We have knife. We can use it to cut vegetables but if somebody uses it for doing murder, knife is not blamed for it.

We should use the invention of science for the welfare of society. We are wise so we should use it for the construction, not for the destruction.

We should use science as our servant. It is rightly said that -

"Science is a good servant but a bad master."

We have to prove science as a boon not as a curse.
