The need for ----- we need.

Title :-

"Need for money."

Notes :- (a) Different people in society produce different things.
(b) Some means of exchange.

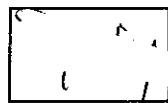

(c) People depend on each other for goods and services.

(d) In an advanced society, we can not go around for the things we need.

Summary :-

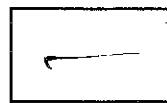

The need for money originates from the fact that different people in society produce different things. It is example that people in a society depend on money. Clearly and simplest means of exchange will be for them to use barter. Barter can work only in a very simple society. In other words to exchange a certain amount of goods for a certain amount of another.

2. Scientific Inventions :-

It is difficult to * count the blessings of science. It has made many inventions and discoveries. Electricity is one of them. It has become ~~and~~ an essential necessity. It lights ~~our~~ houses, cools and warms ~~our~~ rooms, washes ~~our~~ clothes and runs many household appliances. It runs mills and factories, trains and trams. It entertains us in cinemas, ~~it~~ restaurants and television ~~ons~~ etc. It decorates the stages shops and malls.

3. Means of Communications :-

Buses, cars, trains, ships and aeroplanes are the greatest contribution of science. With help of rockets man can travel into space ~~also~~. Science has helped man to reach the moon, mars and other planets. Satellites are providing its great service to mankind. They have made television to ~~appro~~ approach any place on the earth.

* "Our life, today, is governed and conditioned by the offshoots of science."

4.1 Computers :-

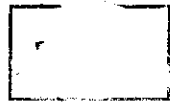

The invention of computers is one of the biggest help to man. They have the capacity to do extremely complicated works in all branches of learning. The computers can doing a lot of works in the least time. However, they are machines they can not think. They work only on the basis of the information feed feed into it, that is programming.

5.1 Medicines and Surgery :-

In the field of medicine and surgery, science has performed itself a great blessings. Many incurable diseases have become curable. T.B. and cancer have been controlled. It has lengthened the life of man and made him stronger.

6.1 Big machines :-

Great and big machines like JCB, Palkam, cranes have made the construction of buildings, bridges and dams easy and quick. Other machines has made our daily life more easy and comfortable. It has made cooking food easy and quick.

70 | Disadvantages :-

Everything has two sides if used improperly machines can become a nuisance. They can destroy lives and property. Atomic bombs can destroy the world in few seconds. Hence, too much dependence on machines has made man lazy and weak. Hence, man should use science wisely. Science can be used for war as well as peace.

★ Gandhi ji has rightly said, "Science has taught us to fly like birds in the sky, to swim like fish in the oceans but it has not taught us how to walk on the earth."

Conclusion :-

No doubt science has proved itself a great blessing. It serves us like a true and faithful servant. We are thankful to science for the services providing to us. Recently scientist have discovered 'God Particle' that is to say they are trying to discover the Almighty. But science should keep common man happy and not scare him.

"Man is called master of the world because of science."
