प्रश्न क्र.

(1) Introduction:-

It is the age of Science. There are many wonders of Science. Science plays an important part in our daily life. It has made our life easier and more comfortable. Science is nothing but a systematic way of knowledge and living. Man's qualities of curiosity, alertness and keen observation of changes in natural happenings has given birth to science and scientific inventions.

(2) Scientific Inventions:-

Scientists have invented several things and machines, big and small through observations of very simple events. Water boiling in a kettle has given us the idea of Railway engine. Falling of an apple from a tree has helped Newton to discover the law of gravity. Electricity is the greatest inventions of man. It serves us in hundreds and thousands of ways. It runs our trains, mills and factories. It washes and irons our clothes.

प्रश्न क्र

It gives us coal air and entertains us through cinema, T.V, and radio besides lighting our houses. Modern life is impossible without electricity.

(3) Means of communications:-

Buses, cars, trains, ships and aeroplanes are the greatest contributions of Science. Man can reach any part of the world within seconds. He has even reached the other planets with the help of Science. The day is not very far, when man will be able to travel easily to other stars and planets.

(4) Medicine and Surgery:-

Science has not only cured man from terrible diseases. It has lengthened his age and made him healthier as well. In the field of surgery, too, science has done wonders. Heart surgery and heart

प्रश्न क्र.

Transplantation have become ordinary things now-a-days. Science has controlled incurable diseases like T.B., leprosy and cancer too.

(5) Atomic Energy :-

with the discovery of atomic energy man has harnessed an inexhaustible source of energy. It can meet the demands of energy of the world for a long time.

(6) Computers :-

Computers are the great and wonderful inventions of Science. Computers have helped man in several fields. They make complex and complicated calculations in a fraction of a second. They help in controlling several machines, T.V. stations and satellites.

(7) Disadvantages of Science :-

Everything has two sides, Science too has a dark side. The inventions and

productions of 'atom' bombs and other dangerous weapons are a great threat to humanity in the world. These can destroy the world within seconds. Secondly big factories and machines have polluted the atmosphere. It is becoming more and more difficult to get pure air and water. Pollution of atmosphere are also a great threat to the world at large.

(8) Conclusion:-

Science is a great helper to modern man. If properly used it can make the life of man healthier and happier. Truly it is because of science that man is called the "Master of the world".
