प्रश्न क्र.

Ques. ~~x~~
fill in the blanks ~~x~~(i) Total ~~x~~Ques. ~~x~~
Select and write correct alternative -

(i) (a) zero

(ii) (b) relationship between input and output.

M (iii) (c) 2nd April to 31 March.P (iv) (a) $\frac{\Delta C}{\Delta Y}$

(b) perfect competition

(vi) (d) Adam Smith.

Ques. ~~x~~
fill in the blanks -

(i) Total revenue

(ii) price ceiling.

(iii) homogeneous

(iv) Reserve Bank of India.

(v) few (5 or 6 sellers but more than two).

प्रश्न क्र.

क

5

3

(vi) Exchange

equal

True or false -

(vii) False.

(viii) True.

M (ix) True.

P (x) False.

B

(xi) False.

(xii) True.

Ques 4. Match the column -

(i) Substitute goods → (b) tea and coffee.

(ii) Complementary goods → (c) car and petrol.

(iii) Depreciation → (e) replacement expenditure.

(iv) Consumption goods → (g) ultimate consumers.

(v) Income analysis of Keynes → (f) short term.
long

Investment \rightarrow (i) the stock of physical capital.

Ques. One word answer -

- (i) The world bank was established in 1945.
- (ii) There is an inverse relation b/w demand & price of commodity.
- (iii) wages are determined by government

M (iv) two.

P (v) Income tax, wealth tax, property tax, etc. etc.
are included in direct taxes.

B (vi) Professor Keynes gave the concept of effective demand.

F

प्रश्न क्र.

Answer → 6.

- * The main differences between a centrally planned economy and a market economy are as follows-

Basis of difference	Centrally planned economy	Market economy
M	Q. Main role Centrally planned economy also known as <u>socialistic</u> economy is that economy in which government or public sector plays an important role. P	B. Q. object The main object of this economy is to provide <u>social welfare or social services</u> & price determined by government.	The main object of this economy is maximisation of profit price determined by demand & supply.
S		
E		

Answer → 7

- * Inferior goods → Inferior goods are also known as gift items. Inferior goods are those cheap quality goods which are generally used by poor people for satisfying their wants.

Relation with demand → Those goods have inverse relation and income → with consumer income. It means if income of consumer increases, then demand of such goods decreases.

प्रश्न क्र.

and vice-versa.

For example → Bajra, Maize, cheap quality clothes, etc.

Answer → 8.

* Price elasticity of supply → The degree of responsiveness of change in supply of a commodity to change in price of a commodity is called price elasticity of supply. We can say in other words, price elasticity of supply is a concept which shows proportionate change in supply to proportionate change in price.

* Types of price elasticity of supply are -

- P 1. Unitary elastic supply
2. More than unit elastic or elastic supply.
B 3. Less than unit elastic or Inelastic supply.
S 4. Perfectly elastic supply.
E 5. Perfectly Inelastic supply.

Answer → 9.

* Price floor → Price floor is the minimum price of a commodity above the equilibrium price, and it is fixed by government for benefit of welfare of producers. It is fixed when market price of a commodity is lower than cost of production. It is also known as minimum support price (MSP).

For example → Price of agricultural products, in case of price lower than cost of production, government provide minimum support price to farmers and purchase their goods in stock at (MSP).

प्रश्न क्र.

7

ये

क

Answer→Q.

* Oligopoly → The word oligopoly comprises of two words 'oligo' and 'poly'. 'Oligo' means few and 'poly' means to sell. We can say, the market in which few sellers are found like 5 or 6 sellers (but more than 2) is known as oligopoly or oligopoly market. The product may be different in quality, size, etc. and each firm can influence the price. For example → Car Companies.

E

Answer→Q.

* Macro economy analysis → Macro economy analysis means is that analysis in which we study about aggregate units like aggregate demand, aggregate supply, national income, general price level, government budget, foreign exchange rate, theory of employment etc. The main object of macroeconomics analysis is to study aggregate units and formation of aggregate policy. Macro economy analysis has broader perspective, gives importance to dynamic economy, analyse general problems of economy and gives priority to group interest.

प्रश्न क्र.

Answer → 22

* personal disposable income → The income which is remained with the consumer in a spendable form is called personal disposable income. The income which is earned by a person is not fully spendable because a person has to pay indirect taxes. So, after deduction of indirect taxes from personal income, the income which is remained is called personal disposable income.

Personal disposable income = Personal Income - indirect taxes.

M
P
B
S

OR

P.D.I. = Consumption + Investment.

Answer → 23

* Barter system → Barter System is that exchange system in which goods are exchanged for goods and the exchange must be voluntary and legal. It is also known as direct exchange. We can say in other words, exchange of less necessary commodity for more necessary commodity is called barter exchange system. For example → A person exchanges 2 kg of rice for 3 kg of wheat. Under this system, money is not involved.

प्रश्न क्र.

Ans → 84

A Budget → A budget is a statement which includes income and expenditure for the coming accounting year. We can say in other words, it is an annual financial plan which includes all types of receipts (capital & revenue nature) and all types of payments (capital & revenue nature) for the next financial year. It is presented in monetary value.

M A government budget is prepared by finance minister and approved by the parliament or president of a nation. It is prepared in the beginning of month of February and on requirement, supplementary budget can also be prepared.

Answer → 15

S**E**

A open economy → An open economy means it is an economy in which the nation or economy has relation with other economies or nation of the world. It means the economy in which foreign trade takes place is called open economy. When goods and services are received, it is called import and when given, it is called export.

It generally comprises of four sectors -

1. Household Sector.

M

P

B

S

E

(iii) Government expenditure (G) → The total expenditure of government is included in government expenditure.

(iv) Net exports ($CX - M$) → The differences between export and imports.

$$AD = C + I + G + (CX - M)$$

Answer → 19

* The main objectives of government budget are as follows -

L. Reallocation of resources → The main objective of government budget is to direct the course of resources from one place to another so that equilibrium can be maintained between profit earning and social welfare.

+ =

13

प्रश्न क्र.

- Reduction in the inequality of income → With the help of government budget, government can reduce the wide inequality of income, it helps the government to bridge the gap between rich & poor.
3. Social welfare → With the help of government budget, government can increase social welfare and develop the infrastructure of a national like building school, hospitals, e.t.c. and provide the employment opportunities.

M
P
B
SAnswer-20.

* The main characteristics of Indifference curve are as follows-

1. Convex to origin → An indifference curve is convex to origin because of application of law of diminishing marginal utility and consequent marginal rate of substitution and it is sloping downwards.
2. Higher Indifference curve, higher satisfaction → A higher indifference curve represents higher level of satisfaction and an indifference curve never touch x-axis or y-axis.
3. Sloping downwards → An indifference curve is sloping downwards to reflect as consumer consumes more and more of one commodity, his consumption of another commodity decreases.

प्रश्न का

Never intersect each other \rightarrow Two indifference curve can never intersect each other because two indifference curve can never represent the same level of satisfaction.

Answer - 21

* The cost curve are 'U' shaped because of the following reasons-

- M** 1. Efficiency in labours \rightarrow The labour works in an efficient manner in reducing the cost per production and maximising the output with same input.
- S** 2. Efficiency in marketing \rightarrow Advertising is done for making the consumer aware of product and some advertising cost is incurred even if there is increase in production.
3. Managerial efficiency \rightarrow The manager of a firm tries to manage the resources of firm in such a way that the cost of production decreases with increase in output and same input.
3. Technical efficiency \rightarrow With the help of improved technology or advanced technology in the process of production, cost of production decreases with increase in output and same input.

प्रश्न क्र.

या... रुप. + रुप. 10 रु. =

रुप. 10 रु.

Answer → 20

15

* The main factors of production and remuneration to each of them are as follows-

1. Land → Land is the most important factor of production. In Economics, meaning of Land is wide. It not only includes soil or surface, it includes all resources which are provided to us by nature like coal mines, rock mines, etc.

Remuneration → Rent is the main source of remuneration to land owner or landlord.

M

P

B
S

E

2. Labour → Labour is the second most important factor of production. It includes physical work as well as mental work and without labour, production is not possible.

Remuneration → Wages is the main source of remuneration to labour.

3. Capital → Capital is related with wealth. It includes wealth for purchasing input or machinery. It includes two types -

1. Fixed capital → plant, machinery, etc.

2. Working capital → raw material, labour, etc.
