Question No. - 18

Answer / OR

Sources of energy :- The sources which gives us energy to fulfill our requirements referred as sources of energy

Difference between Conventional and Unconventional sources of energy are as given below :-

Bases to Divide	Conventional Sources	Unconventional Sources
<u>Meaning</u>	The sources of energy which are <u>exhaustible</u> over a period of time are called conventional sources	The sources of energy which are <u>eco-friendly</u> and <u>renewable</u> are called unconventional sources of energy
<u>Example</u>	<u>Coal</u> , <u>Natural gas</u> , and <u>petroleum</u> or other <u>fossil fuels</u> are recounted in conventional energy	<u>Solar energy</u> , <u>wind energy</u> , <u>Geo thermal energy</u> , <u>Bio energy</u> , <u>Tidal</u> etc. are unconventional energy

B
S
E

B
S
E

<u>Danger to environment</u>	These sources are more <u>dangerous</u> to environment	These sources are not on <u>less</u> dangerous to environment
<u>Stock</u>	Conventional sources are on line of <u>extinction</u> due to <u>overuse</u> they have limited <u>stock</u> .	Unconventional sources are <u>renewable</u> and <u>eco-friendly</u> , they had enough <u>stock</u> .
<u>Recyclable</u>	Conventional sources are <u>non-recyclable</u> , once <u>depleted</u> it took million of years to <u>form</u> .	Unconventional sources are <u>recyclable</u> , once <u>depleted</u> can be produced again in less <u>time</u> .
<u>Exhaustible</u>	They are <u>exhaustible</u>	They are <u>non-exhaustible</u>
<u>Country</u>	<u>Developing</u> countries mostly using <u>conventional</u> sources of energy.	<u>Developed</u> countries using <u>unconventional</u> sources to promote <u>sustainable</u> development

प्रश्न 7.

Question No. - 17

Answer / OR

Suez Canal :- Suez canal was constructed in 1869. It is under the control of Egypt.

Suez Canal connects Mediterranean sea with Red Sea.

Three importance of Suez canal :-

(i) Economic development :- Due to the construction of Suez canal in 1869, Egypt, economic development of the region increased. Egypt became more powerful and dominated the Suez canal.

(ii) Increase in Trade :- There was various hindrances in trade before the construction of Canal. Now, the trade between Europe and Rest Asia has increased to a greater extent.

E
S
E

7

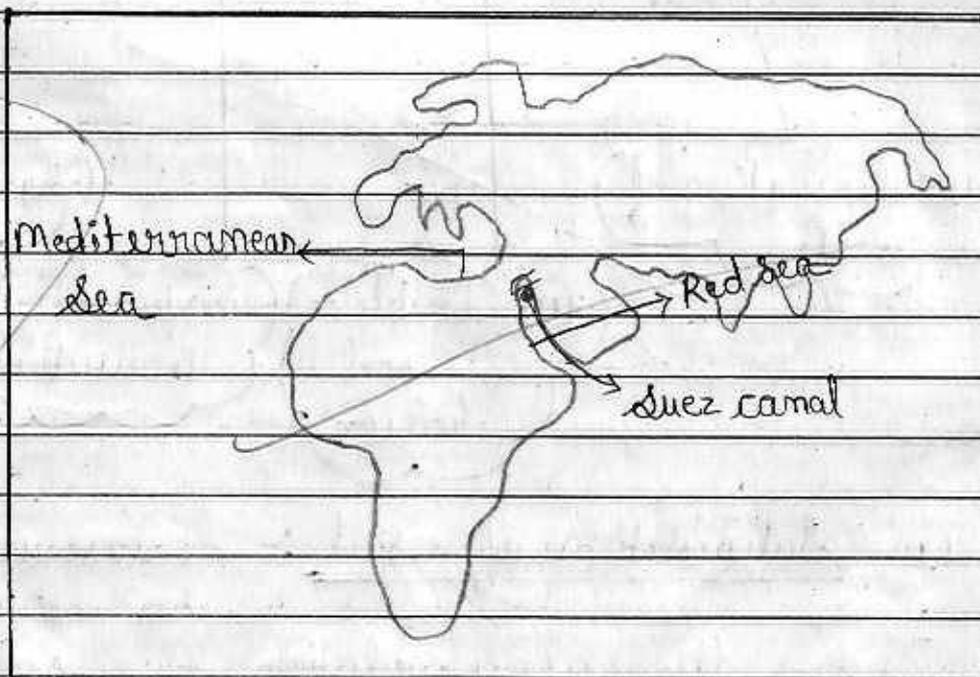

याग पूज

पृष्ठ / पं अंक

(ii) Easy reach to commodities :- By the construction of Suez canal, many ports developed. Various items like iron ore, coal and precious commodities get their way to reach the countries easily through ports.

(i) Reduction in time :- Suez canal has reduced the time of Journey. Earlier we have to approach from Atlantic ocean if we want to trade with European countries and vice versa European countries with Asian countries.

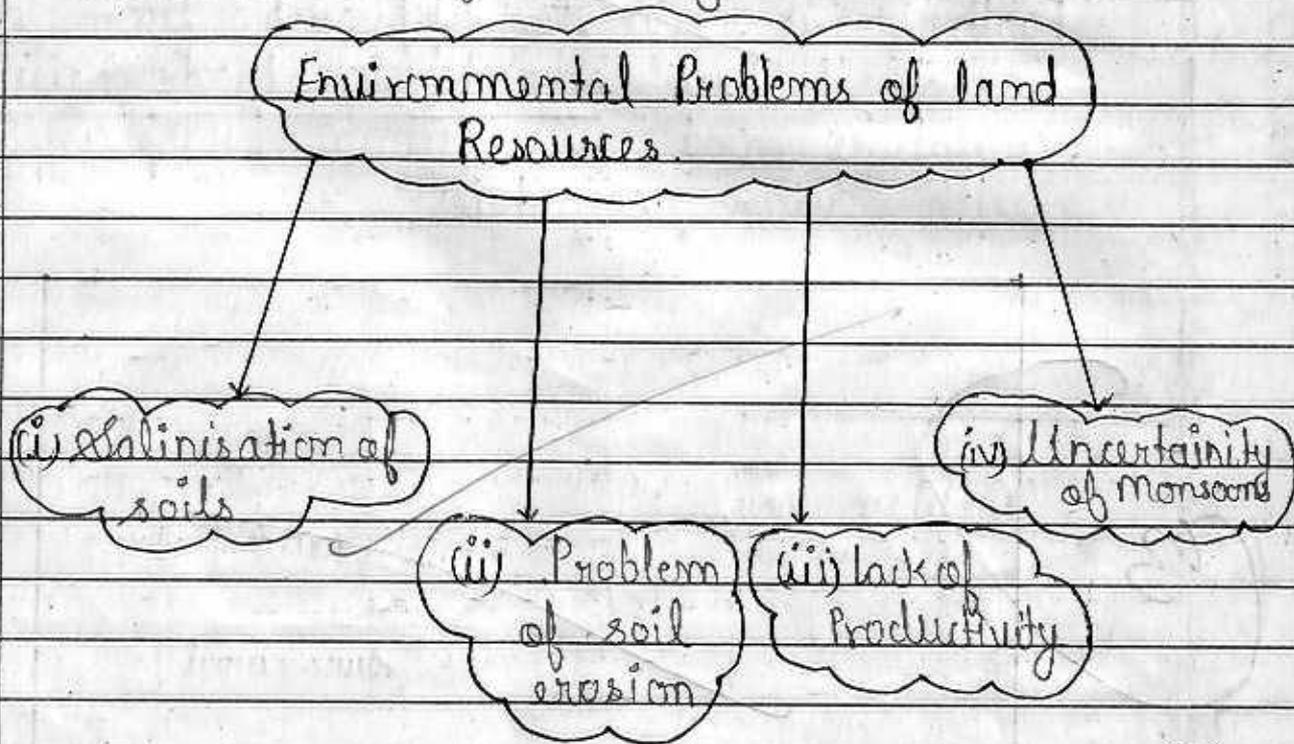

Question No.-16

Answer /OR

Various environmental problems leads bring adverse affect to land resources resulting in the lack of productivity of land.

This adversely affect the economic development of country

E
S
E

(i) Salinisation of soil :- Excessive irrigation on land leads to the accumulation of salty layer and it increases salinity in the soil. Crop failure is normal consequence of salinisation.

(i) Problem of Soil erosion:- Excessive deforestation leads to the erosion of soil. Trees that hold the layers of soil are damaged by humans. Irrigation also leads to soil erosion.

(ii) Lack of Productivity:- The yield of the crops is low in India as compared to developed countries of U.S.A., Japan, Canada. Marginal farmers are not able to use and bought new technology and due to irrigation, land get started losing its fertility and lack of fertility leads to low productivity.

(iii) Uncertainty of Monsoon:- Monsoons are very uncertain in country (India). Rainfall also leads to unequal distribution of water. Example:-

Masynoram (Cherapunji) - Excessive rainfall
Rajasthan - desert region

Due to this, region with excessive rainfall yield good produce but they are not sustainable and unavailability of water results in barren land. Droughts and floods are twin menace.

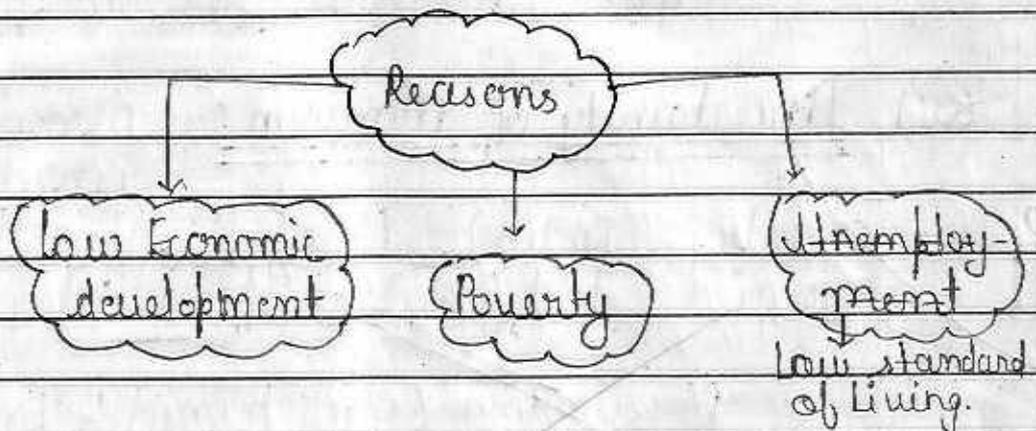

Question No.-15

Answer

Worker Participation:- Worker participation means engagement of Individual in primary activities, trade, construction and manufacturing.

There are some reasons of having a higher participation in some states:-
rate of

E
S
I

(i) low level of Economic Development:- Work participation rates are higher in state with low economic development because more people are required to do subsistence activity.

Ex:- Himachal Pradesh, Sikkim

प्रश्न 5.

Question No.-14

Answer / OR

Mixed farming :- The rearing and milching of animals along with the multiple cropping is called mixed farming.

Characteristics of Mixed farming :-

B
S
E

1. Crop Rotation and inter-cropping.

2. Existence of subsidiary occupation

3. Need of special skills.

1. Crop Rotation and intercropping :- One of the main features of mixed farming is that crop rotation. Single crop is not grown. Instead of single crop, multiple crops are grown in the field.

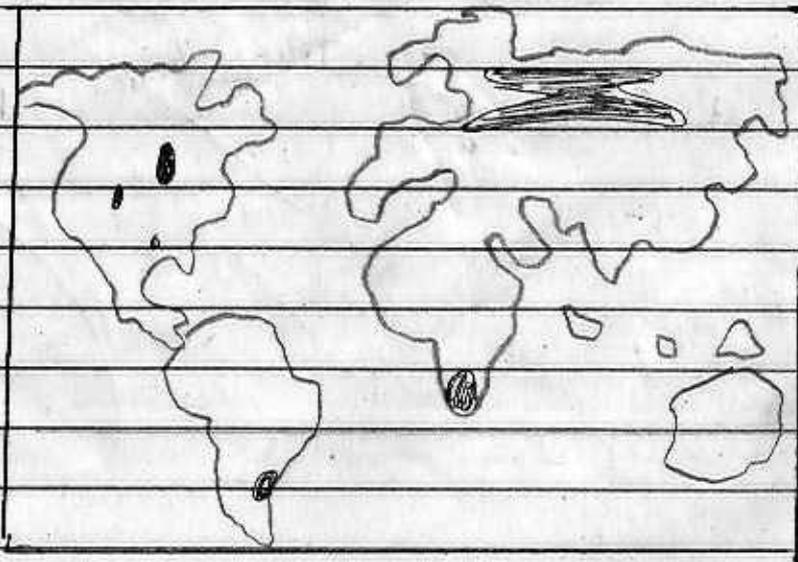

प्रश्न क्र.

(2) Existence of Subsidiary Occupation:- Along with growing of different crops in region, there is subsidiary occupation available for the people. People can rear goat, sheep and cattle.

(3) Need of Special Skills:- Mixed cropping required specialisation of skill. Although it is a labour and capital intensive work but special skills are required to grow the crops with livestock rearing.

Regions of Mixed Farming:- North west Europe and North East USA and some parts of Africa

B
S
E

Question No.-13

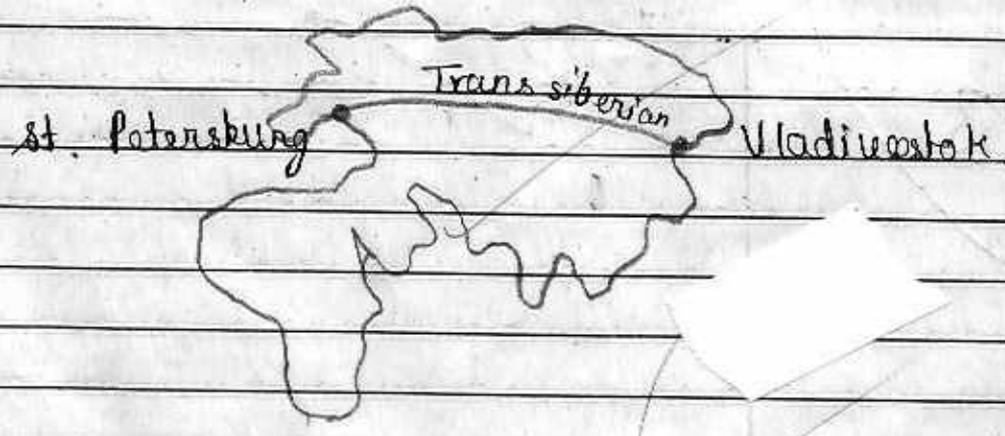

Answer :-

Trans Siberian Railway :- Extends from St. Petersburg to Vladivostok

Characteristics of Trans-Siberian Railway:-

B
S
E

- (i) Trans-Siberian Railway is called lifeline of Siberia which is 9332 km long.
- (ii) It is situated in Russia and its parts include Moscow & Chita.
